#### Objective:

Detail-oriented Backend Developer with a passion for scalable APIs and microservice architecture. Seeking to build robust server-side applications using modern frameworks.

#### Skills:

- Languages: Python, Node.js
- Frameworks: Django, Express.js, FastAPI
- Databases: PostgreSQL, MongoDB, Redis
- APIs: RESTful, GraphQL
- Testing: Pytest, Mocha
- Version Control: Git, GitHub

#### Projects:

##### **\*\*1. REST API for Online Course Platform\*\***

Built APIs with Django REST Framework supporting JWT authentication, file upload, and admin features.

##### **\*\*2. Real-Time Chat App Backend\*\***

Used WebSockets in Node.js and Redis pub/sub for real-time message delivery and chat persistence.

#### Experience:

##### **\*\*Backend Intern\*\* – DevCore Labs**

Jan 2024 – May 2024

- Designed normalized PostgreSQL schemas.
- Integrated third-party services like Stripe & Firebase Auth.

Certifications:

- Django for Web Development – Udemy
- REST API Development – Coursera

Education:

B.Tech in Computer Science

IIIT Hyderabad | 2021–2025
